

YOUR FEEDBACK REPORT

WATER PROJECT

HOW YOU MADE A DIFFERENCE

Prior to the installation of your hand pump the community in Billori, in the district of Purnia India struggled to gain access to clean, safe drinking water.

In addition to affecting the huge rural and urban population, the water scarcity in India also extensively affects the ecosystem and agriculture. India has only 4% of the world's fresh water resources despite a population of over 1.4 billion people.

With your donation you have given this community the chance to a safer way of life, providing the families with access to sanitary water helping them focus on their education and work.
